

# Logistics and Supply Chain Management

## Course Outline

The supply chain is a crucial part of any business' success. Optimising the flow of products and services as they are planned, sourced, made, delivered and returned can give your business an extra competitive edge. This course will introduce you to the basic concepts of supply chain management, including the basic flow, core models, supply chain drivers, key metrics, benchmarking techniques and ideas for taking your supply chain to the next level.

### **This two-day course will teach participants:**

- Define supply chain management and logistics.
- Explain the vertical integration and virtual integration models.
- Understand the stages in the basic supply chain flow.
- Identify participants in the supply chain.
- Recognise supply chain drivers and ways to optimise them.
- Align supply chain strategy with business strategy.
- Determine what metrics to track and how to benchmark the related data
- Troubleshoot basic supply chain problems
- Identify ways to develop your supply chain, such as using third-party logistics providers (3PL's), insourcing processes, developing sustainable and eco-friendly strategies, leveraging process improvement strategies and adopting new techniques

### **Course Overview**

Participants will spend this session getting to know the course objectives and will also have an opportunity to identify their personal learning objectives.

### **Getting Started**

The beginning is always a good place to start. Right here students will learn about the terms that arise from a definition of logistics and supply chain management. Also covered here are related regulations and resources.

### **The Evolution of the Supply Chain**

This session gives students a look at the vertical and virtual integration models for supply chains. The focus then shifts to anticipated changes in supply chains.

### **The Basic Supply Chain Structure**

This session delves into the structure of supply chains. Students are shown the links in a chain, participants in a supply chain, how to design a supply chain, and it wraps up with a look at the bullwhip effect.

### **Supply Chain Drivers**

This is where participants will learn about some key drivers that impact the efficiency and effectiveness of supply chains. Also covered in this session is a discussion of transportation methods.

### **Aligning Your Supply Chain with Business Strategy**

Covered in this session are ways to identify your market and how to look at your role in a supply chain. Also touched upon is how to analyse the data you've uncovered and the next steps to identify where you want to be.

### **Managing Supply Chain Risks**

This session gives participants a chance to consider supply chain risks and ways to manage them.

### **Tracking and Evaluating Supply Chain Data**

This session tackles data head-on and looks at ratios and formulas, benchmarking, the SCOR model, the Balanced Scorecard and supply chain management dashboards.

### **Troubleshooting Supply Chain Problems**

Here, participants are given tips and methods on how to pick up on signs of trouble in a supply chain and supply chain best practices.

### **Sharing Supply Chain Activities**

This is the session that addresses outsourcing, insourcing, offshoring and reshoring. It also covers third- and fourth-party logistics providers, as well as ways to build partnerships within a supply chain.

### **Sustainable Supply Chain Strategies**

Students are introduced to sustainability as it relates to supply chains in this session and how to reduce their supply chain's impact on the environment.

### **Applying Lean Techniques to the Supply Chain**

Lean techniques are useful for a supply chain and you are given a grounding in this topic here as well as how to apply Lean practices to a supply chain.

### **The Future of Supply Chain Management**

It's always good to consider the future of any industry you are involved in and this session looks at the top trends in supply chain management.

### **Course Wrap-Up**

At the end of the day, participants will have an opportunity to ask questions and fill out a personal action plan.
